## Brainstorming for Futuristic Hospitals A NARUVI HENRY FORD initiative

23 Sep 2017: Under the aegis of our Chairman, along with the able leadership afforded to us by our Hon. Dean for Research, Prof. Sridharan, we were able to garner a huge amount of information and inputs from ‘super’ medical

experts. Prof. Padma led the discussion. A large number of questions were raised. Many issues were thrashed out. Most of these were points that get raised after

Seminar - a  
new  
experience

Second  
phase on  
the anvil

hospital operations start, at which point, fixing it is usually a patch up operation. As the old adage goes, “an ounce of prevention is worth a pound of cure”, it is not only true for health care, but also in the designing and construction of health care institutions, especially in the present day of such high end technology, where multiple systems are mated and interlinked before the finishing work is done. There was excellent participation from all the members at the table. It was also reassuring to know that we have such good architects and engineers on board. During the course of the discussions, it came to light that many of the points raised by the audience, had already been taken cognisance of. Three cheers to the Architects and Engineers.

Dr. Satish took us through the rigorous process of setting up an ethical and scientific research facility. It was a very lucid talk that made rocket science sound like a fairy tale!

Accreditation took on a whole different meaning as

Prof. Rajesh spoke to us. From seeing it as an ‘end’ in itself, it made more sense as the ‘means’ to an end, to excellence in medical care.

## Meeting with HFHS and MODEL H

at GRT Grand,  
Chennai

19/20 Sep 2017: Model H & HFHS met The Naruvi management. Architectural, construction & building nuances were discussed in detail relevant to the present stage. Clinical work flows were discussed in detail. Lisa, Dr. Sam & Dr. Muma represented HFHS, while Amber, Dr. Reena & Dr. Surjit represented Model H.

The architects & building contractors were also present.
